We are excited for you to experience trading at an advanced level on one of the world's most popular trading platforms, while taking advantage of JFD's trader-centric solutions. The '+' in our MT5+ indicates an exclusive package of add-ons which gives you a wide range of sophisticated trading tools, putting you one step ahead of other traders. You get access to a choice of 1500+ instruments sourced from 20+ LPs (Tier1 Banks, Non-Bank LPs and MTFs). Choose symbols from 9 asset classes: Forex, Precious Metals, Indices (Cash & Futures), Stocks (CFDs), Commodities, Cryptocurrencies, Bonds, ETFs and ETNs, and our latest addition, Physical Stocks!

With JFD's MT5+ you can take advantage of our outstanding Fill Rate and Positive and Negative Slippage empowered by our 100% DMA/STP Agency Only model, as well as Full Anonymity, Full Transparency, and Deep Liquidity. You can also benefit from Core Interbank Spreads and Low Trading Costs.

We hope you enjoy trading on the MetaTrader 5, known to be the world's most powerful platform, and that our step-by-step, illustrated User Guide will help answer any questions you may have, and set you off towards a profitable trading journey with JFD.

To login to your trading account, open JFD’s MT5+ terminal select File from the Main menu and click on Login to Trade Account (1).

Alternatively, you can select Accounts from the Navigator window (2), and right-click to select Login to Trade Account from the context menu.

1. LOGIN TO TRADING ACCOUNT

2. Navigator window
Enter your account number in the **Login** (1) field and the **Password** (2) which was sent to you in the account activation email from JFD. Then, for Server, select **JFD-Demo** or **JFD-Live**, depending on the account type that you have opened. You can save your information by keeping the respective check box ticked so that you do not enter it each time. Once ready, press the **OK** (3) button to access your account.
A. CHANGING PASSWORD

To change your password, select Tools from the main menu and then Options (1) A window will appear. Click on the Change button (3) in the Server tab (2).
You must first enter your **Current password** (1), then enter your **New password** (2) and **Confirm it** (3). Make sure to save your new password details in a safe place. Press **OK** (4) to save the new password.
B. EVENT SETUP

The **Events** (1) tab in the Options dialog box allows you to assign a particular sound to each event. To disable the sounds, make sure that the **Enable** (2) check box is unticked. To manually select the sound for an event, choose the .wav file for each event to assign a sound to by double-clicking on the sound and selecting it from the scroll down menu.
If there is an event that you do not want to alert you with a sound, this can be disabled by double-clicking on the Bell icon (1), and a Red Stop icon will appear. To enable the sound, just double-click on the same Bell icon again.
The Market watch can be enabled or disabled in one of the following ways:

1. Select View from the main menu and then Market Watch.
2. Use the key combination Ctrl+M
3. Click the Arrows icon from the top toolbar
3. MARKET WATCH

The Market Watch window comprises of four parts:

- **Symbols**

  The Symbols tab (1) allows you to view the list of available instruments. Information about the current number of symbols in the Market Watch and the total number of available symbols is shown at the bottom of the list.

  ![Symbols Tab Image]

  To quickly add a symbol in the Market Watch, click the + sign (2) below the list and enter the name of the symbol. While you type in the name, the list of suitable symbols is shown.

  ![Symbols Add Symbol Image]
3. MARKET WATCH

- **Details**

To view statistics, select a financial instrument in the **Symbols tab** and click **Details (1)**
• Trading

The one click trading option (1) is available on the Trading tab. Upon clicking on the ‘Sell’ (2) or ‘Buy’ (3) button, a request to perform the corresponding trade operation in the specified volume is instantly sent to the server.
3. MARKET WATCH

- **Tick**

To view the tick chart of an instrument, select a symbol in the Symbols tab of the Market Watch and switch to the Ticks tab (1). The platform stores up to 2000 ticks for each symbol.

By right-clicking with the mouse where the instruments are located in the Market Watch windows, a pop-up menu will show up.
To view all instruments available for trading, select Symbols and then choose the desired instruments from the symbol list. To add an instrument to the Symbols list, double-click on it until the Dollar icon (1) turns yellow or press the Show button. (2)

You can eliminate a specific instrument from your Market Watch by selecting the instrument you want to delete and then clicking on Hide (3) or by simply pressing the Delete button on your keyboard. In this case, only the prices for chosen instruments will be visible. You can modify the order of the instruments as per your request through the drag-and-drop function.

**NOTE**

Note: We do not recommend to use the option Show all and open all the financial instruments in the Market Watch, as we offer more than 500 tradable symbols and this can overload the CPU of your computer. It is recommended to open no more than 50 symbols in the Market Watch.
You have the option to view certain groups by right-clicking in the **Market Watch** window and selecting **Sets**. Afterwards you have to choose the group selection you would like to appear e.g. Forex. The **Sets** (1) are standardised by JFD but you can customise them as well. To create a customised set, you will need to create a set in your Market Watch that you wish to use and view in the future. This can be done by eliminating or rearranging an instrument in the **Market Watch** as explained earlier.

Once you have created a **Set**, right-click in the **Market Watch** window, select **Sets** (1) and **Save As** (2). Choose the name that you want to use for your Set and then click on **Save**. To retrieve the Set, you have customised, right-click in the **Market Watch** and select **Sets**. Your saved set will appear in the drop-down menu. Click on the set that you have saved and it will appear in your **Market Watch** window.
You may trade within the **Market Watch** by double-clicking the instrument you want to trade. In such occasions, the Order window of the requested instrument will appear. Alternatively, you can right-click on the instrument you wish to trade and select **New Order** (1) or simply press the **F9 key** (this option will bring up the order window where you will have to choose the instrument that you would like to trade).

The market watch has the potential to provide the following information regarding instruments:

- Bid price
- Ask price
- Volume (the volume of the last executed deal)
- Spread
- Bank (the provider of the financial instrument)
- Last (the last price at which a deal was executed)
To view the Specifications (1) of a certain instrument, right click on the market watch and click on the Specifications button (1). A new window will pop-up containing detailed specifications information regarding the selected instrument.
To view the pop-up prices, click in the Symbols page of the Market Watch window and select **Popup Price** (1) or simply press the F10 key. You are able to trade from this view by double-clicking on an instrument. Furthermore, when you right-click anywhere in the windows and click on **Properties**, you can set your viewing preferences even when monitoring prices. To exit the **Popup prices** window, press the **Close button** (2).
The navigator window may be enabled or disabled in one of the following ways:

- Select **View** from the main menu and then choose **Navigator**.

- Click the **Double Folder** button

  ![Navigator Section](image)

  The **Navigator** section includes the following options:
  - Accounts
  - Indicators
  - Expert Advisors
  - Scripts
A. ACCOUNTS

The **Accounts** section in the **Navigator** window displays all your accounts used in JFD’s MT5+ terminal. To move from one account to another, double-click on one of the available accounts. You can also do this by right-clicking on the existing account and selecting **Login to Trade Account** (1), where you will have to enter your login and password. To delete an account, right-click on the account you want to delete and select **Delete** (2).

You can additionally add indicators from the main menu by clicking on **Insert** and selecting **Indicators**.
B. INDICATORS

In the Indicators (1) group you will find a list of indicators. By double-clicking on the chosen indicator, or by using the drag-and-drop function, you can insert it into the existing chart. You can additionally add indicators from the main menu by clicking on Insert and selecting Indicators.
You can modify the indicators if you have the knowledge to change the code of the indicator. To modify an indicator, select it, right click on it, and then choose **Modify**. 
C. EXPERT ADVISOR

JFD allows traders to use Expert Advisors. They can be used to make the trading procedure automatic so that the investor does not have to constantly watch the market. Expert Advisors (see an example below) let you connect signals, created by trading systems, to your account, allowing you to control open positions, orders and also stops.
D. SCRIPTS

Scripts (1) is an option that is aimed for a single execution of some actions. Unlike Expert Advisors, Scripts are not running tick wise, but on request. They will terminate as soon as their appointed tasks are complete.
The **Toolbox** window can be enabled or disabled in one of the following ways:

- Select **View (1)** from the Main Menu and then click on **Toolbox (2)**
- Use the key combination **Ctrl+T**
- Click on the **Toolbox (2)** icon on the top toolbar
The Toolbox section comprises of 9 parts:

- Trade
- Exposure
- History
- Mailbox
- Calendar
- Market
- Alerts
- Experts
- Journal
A. TRADE

By clicking on the Trade tab, you can find information on the present status of your account and the list of any open positions and/or pending orders. When you right-click in the Trade section, you will be provided with the following options:

- **New Order (1)**: To place order(s)
- **Close Order (2)**: To close your order(s)
- **Modify or Delete (3)**: To adjust the levels of Stop Loss (S/L) or Take Profit (T/P) order(s), alter the level of a Pending Order or delete a Pending Order
- **Trailing stop (5)**: Stop loss (S/L) order aimed at minimising losses
- **Volumes (6)**: Option to view traded volumes as Lots or as Amounts (currency)
- **Profit (6)**: Option to view profit/loss as Points or as Money
- **Report (7)**: Extract detailed report regarding your account
- **Show on Charts**: Graphically shows order(s) on chart
- **Auto Arrange (8)**: For automatic setting of the columns when changing the trading terminal window size
- **Grid (9)**: Show/hide the grid to separate columns from each other
- **Columns (10)**: Provides the opportunity to show/hide the ID/Swap/Profit/Comment columns
B. Exposure

By clicking on the Exposure tab (1), you can find information on the present exposure status of your account, regarding different currencies.

C. History

In the History tab (2), you can find detailed information regarding the closed trades made in your trading account.
When you can right-click in the History section, a pop-up menu will show the following options:

- **Positions (1)**: Presents the new history similar to the account history used in MT4.
- **Deals (2)**: Presents the actual purchase and sale transactions executed based on the orders.
- **Orders (3)**: Presents the information as a list of orders containing all trade requests sent to a broker.
- **Orders & Deals (4)**: Presents the information as a tree of all trading operations showing how the trade requests were processed.
- **Volumes (5)**: Option to view traded volumes as Lots or as Amounts (currency).
- **Select a timeframe (6)**: All History, Last 3 Months, Last Month or Custom Period.
- **Report (7)**: Extract detailed report regarding your account history.
- **Show on charts (8)**: Graphically shows order(s) on chart.
- **Auto Arrange (9)**: Automatic arrangement of the columns when trading terminal window is changed.
- **Columns (10)**: Provides the opportunity to show/hide the ID/Swap/Profit/Comment columns.
D. MAILBOX

The messages that are sent by JFD are located and saved in the Mailbox section. The content of the message can be viewed by right-clicking and selecting View. Alternatively, you can double-click on the message or press Enter to view its content. The email can be deleted by right-clicking and selecting Delete. It is recommended to check this section regularly in order to make sure that you do not miss any important messages. The number of unread messages is shown in red at the bottom of the tab.
E. CALENDAR

The Calendar tab plays the role of economic calendar. Important economic indicators/news are published. A report can be extracted by right-clicking and selecting Export. The starting hours of economic can also be shown on the chart.
F. MARKET

By clicking on the Market tab (1), you can find information for MQL online market that will provide you access to Applications, Magazines, Books and more. The content is sorted in categories to facilitate your selection.
G. ALERT

In the Alerts section, you will find a list of specific signals. When you set an alert, JFD’s MT5+ terminal will alert you with a sound signal when the selected condition is carried out. When you right-click in the Alerts section, you will be presented with the following options:

- **Create (1)**: Set up a new Alert
- **Modify (2)**: Alter an existing Alert.
- **Delete (3)**: Delete an existing Alert
- **Enable On/Off (4)**: Used to switch an Alert on or off
- **Auto Arrange (5)**: Automatic arrangement of the column width
- **Grid (6)**: Show/hide the grid that separate columns from each other
When you click on **Create**, the Alert Editor window will appear with the following fields:

- **Symbol** (1): Instrument
- **Condition** (2): Select from a dropdown list of conditions (time, bid<, bid>, ask<, ask> etc)
- **Value** (3): Input the number which the condition applies to
- **Source** (4): An event that will take place when the conditions of the Alert are met
- **Enable** (5): Enable/disable the Alert
- **Timeout** (6): The time when the Alert will be reactivated
- **Expiration** (7): The expiration date and hour at which the Alert will be disabled
- **Maximum iterations** (8): The number of times the Alert will be reactivated
H. EXPERTS

Any Expert Advisor that has been used in the current session will be stored in this section. Please note that Expert Advisors must be enabled in order to view this tab. You can do this by clicking the AutoTrading (1) button on the top toolbar.
Alternatively, you can select Tools from the Main Menu and then Options. Click on the Expert Advisor tab (1) and make sure that the Allow automated trading (2) check-box is ticked.
The Journal section stores any activities performed in JFD’s MT5+ terminal in the course of the current session. This includes deals, the Expert Advisors that had been used, and information on the operation(s) of the terminal.
There are 3 ways to open a **New Chart** window:

- **Select File** from the main menu and then select **New Chart (1)**
  Proceed by selecting the desired instrument from the drop-down list.

- **Click the New Chart (2) button** located on the top toolbar and select the desired instrument. Its chart will open a new window.

- **Use the Market Watch** window. Select the instrument you want to view in a chart and drag and drop it to the right side of the platform.
You can arrange the charts automatically by choosing the desired arrangement from the **Window** tab on the main menu. On the bottom of the chart area are situated the tabs of the open charts, with the names of the symbols and the time frames on them. You can use these tabs to switch between charts. Double-clicking on the tabs will reduce or enlarge a chart. Same steps apply when you right-click on the tab to select **Maximize** or **Minimize**. To close chart, right-click on the tab button and select Close. Alternatively, you can close, minimise or maximise charts by pressing the respective buttons in the top right corner.
The below mentioned options will be presented to you when right-clicking on a chart:

- **Trading**: This feature allows the trader to open a New Order directly from the chart or place an Order on the chosen price
- **Resolution**: Function helpful for making videos. The menu provides the most popular resolution options used in various videos services
- **Depth of Market**: Price breakdown according to the quotes received for each trading volume level
- **One Click Trading**: Activation/deactivation of the feature for the particular chart
- **Indicators List**: Opens up the Indicators window which shows the indicators applied in your chart (this option will not appear if no indicators have been chosen in your chart)
- **Object List**: Opens up the Objects window
- **Expert List**: Opens up the Experts window which shows the expert advisors that are currently running (this option will not appear if no expert advisors have been chosen in your chart)
- **Price representation**: Allows you to choose to work with Bar Chart, Candlesticks or Line Chart
- **Timeframes**: Allows you to choose the time period for charts
- **Template**: Sub menu will show up, where you can load a chart template that was previously saved (settings and indicators). This can be done by clicking Load Template. You can also save the current chart settings as a template by clicking on Save Template
- **Refresh**: To refresh the chart, click on it
- **Auto Scroll**: Scroll the chart to the end on tick incoming
- **Chart Shift**: Shift end of the chart from right border
- **Tick Volumes**: Show/hide the chart of volumes. (The Volume on a Chart is the amount of tick movements of the price within the given time frame on the Chart)
- **Zoom in**: Enlarges the size of the bars in the chart
- **Zoom out**: Reduces the size of the bars in the chart
- **Save As Picture**: Saves the chart in a picture
- **Properties**: Aims to alter the background colour of the chart, the foreground colour of the time scales and price scale, the grid colour, bar up, bar down, bear candle, bull candle, line graph, the colour of the volume chart, the ask price level and the bid price level, the stop-loss (S/L) and take-profit (T/P) levels
To add different lines and symbols to the chart, click on **Insert** from the main menu and then select **Objects**. You can edit objects/graphical instruments (lines and symbols) by double-clicking on an object to select it, then right click and click **Properties** (to also move and delete). Note that the graphical instrument that you are working on will not be unselected when choosing in the next one. To unselect an object, you have to double-click on it again, or else, when you edit one, you will have to fill in the properties of all chosen objects. Lines, symbols, etc. that you have selected, can be moved independently from each other.

The following graphical instruments are available and can be selected from the top tool bar:

- Crosshair
- Vertical Line
- Horizontal Line
- Trend Line
- Equidistant Channel
- Fibonacci Retracement
- Text
- Text Label
- Arrows
To insert indicators to the chart for technical analysis, use one of the following options:

- Click on **Insert** from the main menu and then click on the **Indicators** option
- Use the key combination **Alt+I**
- From the **Navigator** window select **Indicators** menu, select the desired indicator and then double-click on it, or drag and drop it on the chart.
- Click on the **Indicators** button from the top tool bar (2)
- To delete and indicator from the Chart, select it, right-click and choose **Delete Indicator** (3)
- Alternatively you can open the **Indicator** List, select the desired indicator and delete it.
When double-clicked, before an indicator shows on the chart, the Indicators settings window will appear. If needed you can set its parameters and then click OK (1). As soon you close the Indicators window the indicator will show up in the chart.

You may use a Template when using the same set of indicators. Once you have inserted the indicators in one chart, click on Charts (1) from the main menu, select Template (2) and then Save Template (3). To use the saved set of indicators in a different chart, again click on Charts from the main menu, select Template and then Load Template (4).
To open a new position using MT5+’s built in trading functionality, use one of the following options:

- Click on Tools from the main menu then select New Order
- Press the F9 key
- Double-click on the instrument in the Market Watch window
- Right-click on the instrument in the Market Watch window and then select New Order
- Right-click in the Terminal window in the Trade section and click New Order
- Right-click on the chart and under Trading, click New Order
- Click on the New Order button located on the top toolbar
- Right-click in the Tick Chart of a selected instrument and then select New Order
- Double-click on an instrument in the Popup Prices window. To view the Popup Prices, press the F10 key.
The **Order** window will pop up when you open a new trade. In the **Symbol** field you can choose the instrument you want to trade. In the **Volume** field you can choose the size of the trade in number of lots. To trade instantly, choose **Market Execution** in the **Type** field and click **Sell by Market** (1) or **Buy by Market** (2) to place the order. Once the trade has been placed, the open position will be also shown in the **Trade** tab of the terminal.
To place a **Pending Order** (1), select it from the **Type** (2) field in the **Order** window. You can also have the option of setting a **Stop-Loss** (3) and **Take-Profit** (4) on your orders. This can be done by filling out both relevant fields in the Order window. Fill in the details of the order you want to place and then click the **Place** (5) button. Once a trade has been placed, you can find it by clicking on the **Trade** tab located in the Terminal window.
If the settings of an order that you placed were wrong, you will not be able to place the order. The Place button will be grey, until your parameters of the order are valid.

If you want to delete or adjust an order, double-click on it in the Trade tab of the Toolbox window, or alternatively you can right-click and select the Modify or Delete (1) button.
To delete (1) the order press the Delete button. If you want some modifications to your order, make the desired changes and once you are finished press the Modify (2) button.

**NOTE**

Note: We do not recommend to use the option Show all and open all the financial instruments in the Market Watch, as we offer more than 500 tradable symbols and this can overload the CPU of your computer. It is recommended to open no more than 50 symbols in the Market Watch.
One Click Trading is activated from the Tools (1) main menu, by selecting Options (2).
In the Options window select the Trade tab and tick the check-box One Click Trading (3). If this box is not ticked, a confirmation window will open each time before trading directly from the chart.
In order to open the One Click Trading tool in a chart, please right-click in the chart and choose One Click Trading (1).
Alternatively, it can be activated with the key combination Alt+T, or by clicking on the One Click Trading button, located in the top left corner of your chart (2).
To set SL and TP levels on an open position, just click and drag the trading level of an order upwards (TP for BUY positions) or downwards (TP for SELL positions). When **One Click Trading** mode is enabled, dragging of the trading levels of orders and positions results in an immediate modification of the appropriate order without showing a trading dialog. When you right-click on the trading level line a context menu of the relevant order is opened. The menu allows managing the level right from the chart.
To close a position at a market price, double click on the open position located in the Trade tab of the Toolbox window. A dialog box will then pop up. In the field Type, select Market Execution (1). To close the position at the current price, click the yellow Close button (2).

Alternatively, you can close the position at market price by right-clicking on the order you want to close and select Close Order (3) from the context menu. If One Click Trading is activated, the order will be closed immediately and the additional confirmation dialog box shown on the previous picture will not appear.
You can close a market order or delete a pending order with only one click when you click on the grey Close (X) button (1) located next to each order in the right-hand side of the **Trade** tab of the Terminal window. This functionality will be available only if the **One Click Trading** tool is enabled.
To partially close an order, open the Order window and before pressing the yellow Close (1) button, set the volume of the order you wish to close and then press the Close button. For example, if you have a 1-lot order and you would like to reduce the lot of the order by half, select 0.5 lots and then click on the Close button. The current order will remain 0.5 lots.

![Order window with close function](image)
JFD is a leading Group of Companies offering financial and investment services and activities. “JFD Bank” is a brand name and registered trademark owned and used by the JFD Group of Companies, which includes: JFD Group Ltd (ex. JFD Brokers Ltd), a company with registration number HE 282265, authorized and regulated by the Cyprus Securities and Exchange Commission - CySEC (licence number: 150/11), JFD Overseas Ltd which is authorized and regulated by the Vanuatu Financial Services Commission (License number 17933) and JFD Bank AG which is authorized and regulated by the Federal Financial Supervisory Authority (BaFin) and by the Deutsche Bundesbank under license number 120056.
